

DADOS CONSULTING

A DBA of Valme Analytics LLC | NMSDC-Certified Minority Business Enterprise (MBE) | Small Business

Healthcare data modernization. We move health systems off legacy infrastructure and onto cloud platforms leadership can trust.

CAPABILITY STATEMENT

Dados is a healthcare data architecture firm specializing in Epic analytics and cloud migration, Microsoft Fabric, Snowflake, and Databricks. We pair RHIA-credentialed clinical depth with hands-on cloud engineering, delivered by a principal who has done the work inside hospitals, not just advised on it. From pre-award proposal architecture through delivery, Dados helps health systems and their consulting partners modernize reporting, recover revenue, and meet compliance standards.

CORE COMPETENCIES

- **Epic Analytics & Cloud Migration** — Migrating Epic reporting and analytics data (Clarity, Caboodle, Crystal Reports) onto modern cloud platforms. Reporting Workbench, SQL, and SlicerDicer delivery.
- **Cloud Data Architecture** — Microsoft Fabric, Snowflake, Databricks, Azure, GCP / BigQuery. Medallion architecture, pipeline automation, governed analytics layers.
- **Business Intelligence & Analytics** — Power BI, Tableau, Looker, SQL. Executive dashboards and KPI reporting for clinical, financial, and operational leadership.
- **Data Integrity & Revenue Recovery** — Audit-grade validation, discrepancy remediation, recurring controls that protect revenue and reporting accuracy.
- **Compliance & Quality Reporting** — Joint Commission measure reporting, regulatory and survey-readiness reporting through a data and architecture lens.

DIFFERENTIATORS

- **Clinical + technical in one firm** — RHIA-credentialed and Epic-certified. We understand how clinical, financial, and operational data behaves because we came up inside health systems.
- **Pre-award to post-award continuity** — We make proposals credible before the award and lead delivery after it. Most firms do one or the other.
- **Verifiable outcomes** — Track record includes reconciling \$1B in revenue discrepancies, recovering unrealized revenue through data-integrity work, and cutting reporting turnaround 70%.
- **Principal-led delivery** — Engagements are led by a senior architect on the work, not managed from a distance while juniors learn your environment.

ENGAGEMENT EXPERIENCE

Epic-anchored health system (via Deloitte) — Directed migration of 2,000+ mission-critical reports from Oracle to Looker with a delivery team of 12+. Surfaced 30% in unrealized revenue. Architected Joint Commission stroke-measure reporting.

Nationally ranked pediatric hospital — Automated manual reporting. Built the enterprise Power BI standards layer that became the dashboard governance reference. Returned 1,440 analyst hours per year.

Non-profit academic health system (6 hospitals, 1,030+ beds) — Advised modernization off Tableau and on-prem SQL onto Microsoft Fabric. Cost case for F64 capacity vs. Microsoft 365 unlimited Power BI viewer access. Gateway setup ahead of Epic Cogito Cloud cutover. Rolled out 200+ executive reports. Built greenfield reporting across revenue cycle, surgical, marketing, and ERM.

National payer organization — Migrated complex on-prem SQL workloads to Snowflake. Led payer-escalation reporting that reduced denials. C-suite visualizations leadership could act on.

PRINCIPAL'S BACKGROUND

Before founding Dados, Isaac Valme held senior data roles inside major healthcare organizations:

UF Health Shands — Increased revenue 44.75% (\$1.4M); scaled improvements to \$11.7M impact; improved documentation accuracy 9.47%.

A national imaging provider — Reconciled \$1B in revenue errors; stood up in-house reporting that cut vendor cost and turnaround 70%.

HCA Healthcare — Lead Power BI Visual Designer and Developer.

Top-20 pharmaceutical company — Principal Data Strategist; source-of-truth data model and Power BI reporting.
